DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Pozgay et al (US007079815B2).

Per claim 1, Pozgay discloses an apparatus (e.g. monolithic microwave integrated circuit transceiver) comprising: an antenna (see figure 1 and item 14); an AlGaIn amplifier (see item 28) (e.g. balanced amplifier of an MMICs) connect to the antenna; a transmit path, connected to the amplifier, which provides a signal for amplification of the amplifier; and a receive path, connect to the amplifier, which receives an amplified signal from the amplifier (see column 1 and lines 50-67).

Per claim 2, Pozgay further teaches a switch (item 12) with an output connected to the amplifier, a first input connected to the received path and a second input connected to the transmit path (see figure 1).

Art Unit: 2618

Per claim 3, Pozgay further teaches a second switch (item 18), wherein the second switch has first switch positions connecting a signal for transmission to the antenna, and a second switch position connecting the receiving path to the antenna (see figure 1).

Per claim 4, Pozgay further teaches that a switch controller (see item 22) which controls the first and second switches to selectively connect the antenna to the amplifier for amplification of a received signal and the amplifier to the antenna for amplification of a signal for transmission (see column 4 and lines 14-18)
